PRIMO COMPACT – When a smaller lift is required

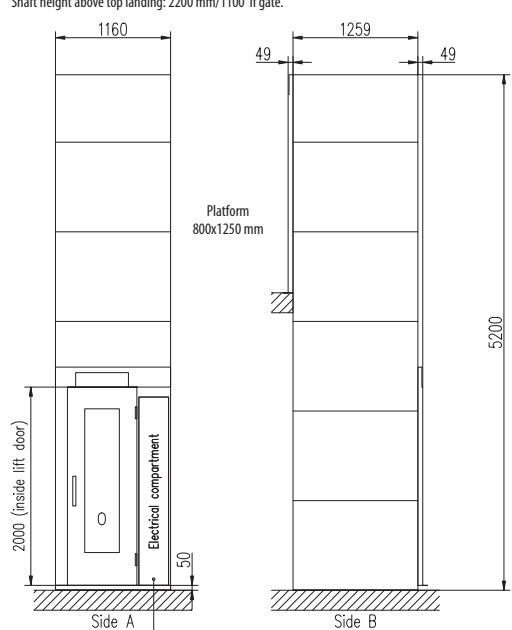

KALEA A4 PRIMO COMPACT is the smaller version of the A4 Primo. It offers the same variety of materials, colours and safety options. The big difference is the platform size, where the A4 Primo Compact provides you four different sizes to choose from.

THE A4 PRIMO COMPACT has a self-supporting shaft with a built-in guide rail. The lift can be installed directly on the ground, no pit is necessary. The A4 Primo Compact is delivered with an integrated lift shaft made of steel or safety glass panels and is swift to install. Smart, aesthetic elegance, attractive pricing and great safety features make the A4 Primo Compact perfect accessibility solution for all types of buildings that require a smaller lift!

THE A4 PRIMO COMPACT is EC-type tested and certified by the Notified Body DNV, Det Norske Veritas, according to the European Machinery Directive 2006/42/EC and the forthcoming European Standard for platform lifts.

Shaft height above top landing: 2200 mm/1100 if gate.

For more information on different models, please visit www.kalealifts.com or contact us at Kalea Lifts.
